

## New managerial methods and technological advancements reinventing Nanotechnology and Materials Engineering

**Abdeen Mustafa Omer**

Associate Researcher Energy Research Institute (ERI) United Kingdom, E-mail: [abdeenomer2@yahoo.co.uk](mailto:abdeenomer2@yahoo.co.uk)

[Nano Mat 2020](#) which is scheduled to take place in Paris, France during February 12-13, 2020 takes the pleasure to invite all the participants, speakers, students, delegates, sponsors, exhibitors from all over the globe to attend our conference

These events cover wide range of critically important sessions that deals with the current research development in the field of Nanotechnology and Materials Engineering. These conferences act as a best platform for attendees to learn about the recent trends in Nanotechnology and Materials science as Nanotechnology is a rapidly developing technology with potential functions in many sectors of international economy, specifically healthcare, cosmetics, energy, and agriculture among others. The technological know-how is revolutionizing each industry, while rather attracting international attention.

Owing to its wide range of uses, the international nanotechnology market is predicted to develop at a CAGR of around 17% at some point of the forecasted period of 2018-2024. Thus, there lies a fantastic probability for industry individuals to tap the fast developing market, which would garner large income on the returned of commercialization of the technology. According to the World Health Organization (WHO), 2.5 billion humans lack safe consuming water at home, and around 1 billion people lack desirable sanitation. Potable water has been a developing subject in the world for pretty a few years, and this state of affairs is main to a demand for water purification which is growing possibilities for the

providers in the nanotechnology market that had a valuation of \$48.89 billion as of 2018. Furthermore, owing to the application of nanotechnology in various sectors, the demand for the identical is poised to look at an escalation at a worthwhile compound annual boom charge (CAGR) of 14.55% all through the forecast length 2019-2025.

Water cure industry is making strides in the APAC area which is leading to an augmented demand for the membranes. Membranes are the most prominently used nanotechnology products. Furthermore, superior lookup on nanotechnology in this area is supporting the market. APAC had the maximum nanotechnology market share of 31.12% in 2018.

### **Our Internal medicine and [Nano Mat 2020](#) conferences mainly focus on topics such as:**

Nanoparticle Technology, Materials Science and Engineering, Nanoelectronics, Pharmaceutical Nanotechnology, Nano Computational Modelling, Material Processing and Manufacturing, Nanotheronostics, Computational Material Science, Nanotechnology in neuro engineering, Graphene, Nanobiotix, Biomedical nanomaterials, NanoGeo Science, Nanotechnology in Space, Nanophotonics, Molecular Nanotechnology, Nanofabrication, Nanotoxicology, Nanolithography, Forensic nanotechnology, Quantum dots, Nanospectroscopy, Nanotechnology for Energy and Environment

### **Relevant journals:**

1. Journal of Nanomaterials & Molecular Nanotechnology
2. Journal of Material Sciences & Engineering
3. Journal of Nanomedicine & Nanotechnology
4. Journal of Material Sciences
